

Bee incursion Kindergarten and Preschool Program

WHO WE ARE?

At Friends with honey, we want to capture children's fascination and love for nature and equip them with the skills necessary to recognise and protect nature. All facilitators have a current WWC check.

WHAT WE DO?

By taking a closer look at the fascinating world of honey bees, children will be able to comprehend the importance of our powerful pollinators.

We'll use open-ended questions during bee activities and help children learn some bee vocabulary. At the end of this session children will be buzzing with excitement and eager to share what they have learned with their families.

WHAT'S THE BUZZ?

Preschoolers often tend to think of bees as bugs that sting. During this incursion, we'll talk about bees as our friends with honey.

During this interactive one hour session children will engage in a variety of fun activities including;

- Meet Bella the bee puppet and learn about the members of her bee family
- Sing bee themed songs from the Friends with honey kids album
- Learn how bees communicate through dance AND dance like a bee!
- Read bee themed books and discover some fascinating bee facts
- Learn about pollination and pollinate some colourful flowers
- Have a look inside a beehive (minus the bees)
- Try some delicious Melbourne honey

Did you know that it takes one bee their entire life time to make just one twelfth of a teaspoon of honey!

Did you know that bees dance to tell each other where the best flowers are?

Flowers make themselves look and smell beautiful so that bees fly down and collect their pollen and drink their nectar.

When a bee flies to another flower, it takes pollen with it, and the pollen falls into the new flower. This means that the plant can make seeds and grow the fruits and vegetables that we eat.
